MOD Infomation Play one race to get Unlimited Coins! To get Unlimited RP, earn them once! Car racing is a sport that was born in the 1900s. Along with the history of this sport, there have been many famous races born and loved by everyone. Some races such as Targa Florio, 24h of Le Mans, Monaco Grand Prix... Many riders have built a name and popularity through the races. The most successful is the name Lewis Hamilton, the number 1 racer in the world. This is also the person I admire and inspire me about this sport. I always wanted to be able to become a super racer. Surely many of you have the same thoughts as me. But that is not easy to realize. Luckily I got to know Drag Racing. This is an attractive racing game with realistic design and context. Players will participate in the racing village with dramatic and suspenseful matches. Drag Racing has become a familiar name and is sought by gamers. The game gave users great emotions. If you do not know Drag Racing then give it a try. Surely you will have the same comment as me. Download Drag Racing mod - Experience the ultimate racing game If you ask which car racing game is the most attractive, then my answer is Drag Racing. It's not easy that the game is loved and appreciated by so many people. A collection of famous cars and the change of the racetrack has created a very own Drag Racing. The races are portrayed in a real way. The fierce competition to the finishers of the racers was dramatically re-enacted. You will be completely satisfied with what a racing game like Drag Racing brings. It's like a stage where your passion for speed shines. If you do not believe it, try the Drag Racing race. You will definitely be addicted. Unlock customizations The interesting thing that Drag Racing owns is that during the game you will have the opportunity to unlock certain customizations. But to be able to do this you need to meet certain requirements. And the most common way is the results of the races. The more wins you win, the more your chances of unlocking. These opened customizations will help players get more items to decorate the car or change to a new vehicle. How many customizations can you unlock? Let's try it. Many levels of play The variety of levels in Drag Racing is indispensable. The game equips players with many different levels of play. They are suitable for many different types of play. The low levels will be available to beginners. The higher up, the difficulty of the races increases. Requires players to have certain steering training to pass. Players can depending on their current abilities to choose a level of play that best suits them. It neither discourages you nor bored you. Overcome your opponents Very few racing games have online game modes against other players. Drag Racing is a racing game that owns that design. Players can choose 1 vs 1 or join the 10-player race in Pro League. Instead of participating in the pre-installed race, joining the race with other players will make the race much more dramatic. Your challenge will become more attractive with the chase to the finish with other opponents. Your ranking will be improved by the results obtained. Surpassing your opponent's car is not easy. But don't get discouraged yet. Focus on how you can reverse the situation and hit the finish line brilliantly. Maintenance and upgrade In order for the car to help you win glory in the races, its owner must also pay attention to upgrade it. Do not focus too much on designs for upgrading vehicles. Drag Racing only has a few customizations for this function. The most prominent can be mentioned is the chassis system, the fuel. They are periodically maintained and maintained. Like a horse after being eaten, its fighting power will be restored after a bit of rest. So is your car. They also take time to inspect and replace some parts if necessary. All the above factors have created the appeal for Drag Racing. This is really a completely new and attractive racing game. For those who love speed Drag Racing will be an option not to be missed. Surely you will be satisfied with what the game brings. Download the Drag Racing mod to participate in extreme races to create life-long performances and win the champion position. No Limit Drag Racing 2 MOD APK is a sports car racing game but unlike any racing game you've ever played, because it has many surprisingly engaging game modes. Introduce about No Limit Drag Racing 2 An engaging multi-view racing for Android. Diverse and improvised game modes that put you in a "sweet" race In the beginning, No Limit Drag Racing 2 will open with a game mode selection screen. It can be said that this is the racing game with the most game modes among the games of the same genre I have ever known. Let me list a few modes for you to consider: Career mode: Racing to win prizes. You will go through difficult roads and dramatic races, fight against AI rival cars, if you win, you will get bonuses and upgrades for the next races. Multiplayer mode: Racing head-to-head against other players in the game system. In this mode, the racing system may be less diverse, but the level of slickness is infinite. The goal is for you and other players to have the land to show off their talents when racing. Free Ride mode: Follow the beautiful roads lightly, comfortably, freely to see everything around. There is not too much competition here, and the races are also longer, the scenery is more beautiful and more variety for you to enjoy. And there are a few more racing modes that are being completed and expanded in the future according to the developer. With intuitive gameplay, once you get used to it, you will master all No matter what mode I play in, my first impression of No Limit Drag Racing 2 is overwhelming. The game is designed with a horizontal screen to maximize visual effects and three-dimensional images. The cars are so nice with eye-catching colors and design. The scene appears realistically to each wheel track on the sand, the four sides open to the vastness. You start the exciting race with such an overwhelming feeling. The operation of No Limit Drag Racing 2 is also simple. The bottom left of the screen is the simulated navigation buttons, which usually only appear left and right for you to choose, but in some situations where the space in front of you has too many turns, there will be more back and forth buttons for you to locate. On the right of the screen are the buttons to select the view direction. With a direct view (like in first-person shooters), you will see the front of the car, just like the feeling of sitting in front of the steering wheel. Having a view from the back, you should use this to observe the accuracy of sharp turns, which makes it easier to master the steering wheel. With a full rear view, you will feel like you're the one running behind your own car and watching how it moves. With this perspective, you can capture the overall scene with larger and more open eyes, and it's also good for observing opponents in multiplayer modes. In the middle is the speed circle, showing the player's current velocity. Depending on the case, you will have the appropriate adjustment to increase and decrease the speed. This speedometer appears in any view, so rest assured, you can always control the speed. An extremely sophisticated Test & Tune mode There is another very interesting thing when starting the game. You will be able to choose and customize your racing car quite a lot in Test & Tune mode. The game is so sophisticated that it creates a 3-dimensional image so that you can freely "build up" the car you like the best with the available components. It feels like assembling Lego, so exciting! You can choose the vehicle type, frame, wheels, paint color, bodywork, body kits, and decals with many cool shapes. And those are just the basics. Later, when you go through the next few rounds, you will in turn have more items to freely modify and customize the car. No matter how cool the car is, it really can't make you win, the important thing is still the skill. Anyway, with a car which is not only good but also beautiful, the excitement will increase many times, won't it? And when you have finished designing your favorite car, let's choose another game mode and start your race. If you want a better, more beautiful car for the victory, you have to wait for more massive upgrades: modify the internal structure of the car to change speed, save fuel through upgrading the engine, door intakes, valves, exhaust pipe, layer... These things will be done in turn if you have some basic wins and have the potential to come to later scenes. Graphics and sound No Limit Drag Racing 2 has excellent 3D graphics with wide-open horizontal screen mode and many different multi-dimensional views. Honestly, I have never played any racing game that brought so many complex emotions like this game. It is all thrills. An interesting point of the 3D graphic style in No Limit Drag Racing 2 is the color tone. It does not use dazzling colors, nor vague like the clouds. The racing scenes in the game are very realistic, most of them feel neat and all have quite retro color tones, like the color tones often found in cowboy games. This dominant color tone makes the vehicles very well highlighted. You can be more focused on driving and not be affected by other visual factors. The sound in No Limit Drag Racing 2 is realistic and vivid. From the sound of starting the car to the screeching on the road when coming to the turns, and the sound of cars accelerating... Everything is clear and detailed. So, playing the game with an extra speaker will be so great. MOD APK version of No Limit Drag Racing 2 MOD features Unlimited MoneyUnlimited GoldMember UnlockedNo Ads Download No Limit Drag Racing 2 MOD APK for Android It can be said that, up to now, No Limit Drag Racing 2 is the most "heart-to-heart" racing game I've ever played. From plenty of game modes to rich visuals, accessible gameplay, and beautiful scenery, all of them harmonize and create a racing game that surprises everyone from the first appearance. Try it out guys, you'll be as amazed as I am.
